Major Douglas Deals Blow To Aberhart

Cited from Page One

regarding the attainment of these objectives. It is most improbable that he would either have the time or the inclination to concern himself with the purely technical aspects of the matter. While my concern is that Mr. Aberhart is the sly, the sly, and is in fact confined to short interviews in which only the most general and vague statements are discussed, I am informed that he also takes up this subject.

To my mind it has to be recognized that the correct methods of dealing with this problem in the attainment of the objectives put forward by Mr. Aberhart are not to bring about the reorganization of even a small number of highly educated men, chiefly because they are a concern to us, but only a small number of experts are instrumental in carrying out the common and erroneous conceptions held in regard to mat-

terialistic mistakes.

"It appears to me to be quite reasonable to assume that a popular leader, a distinct from social experts, would easily come to an understanding with an understandable picture rather than with great detail.

"As a matter of opinion, I think the best method of dealing with this detail is to general audience to put great an extent, but that is not the case. I am of the opinion that Mr. Aberhart should as a matter of course, when he makes such deals, and they are not a matter of principle with him.

"With these primary requirements in mind, I would like to be regarded as an integral part of my criticism of the present paper. I would say that the explanation of the First Prize is not that which can be applied to the other three, as used by the responsible literature of Social Credit, and this has been described as a proposal for regulating prices, together with a freezing of

the production of goods.

"The proposal appears to contemplate a fixed price regardless of cost, and a fixed price is to be maintained as constant, and this price includes something labeled 'the unearned increment' which has been applied in relation to this phrase as used in the Social Credit literature.

"For the purpose of increasing purchasing power it is a form of taxation, and it is a form of taxation, purchasing power by raising prices.

"To invest a confidence between the values and the purchasing power to liquidate them. There is also a suggestion of a complete abandonment of the Velocity of Circulation theory, is the effect that the money will have to be created by means of turnover. Both under the form in which it seems to be proposed here, and it is quite frequently quoted by ethodes, namely, it is demonstrated in excess.

"For an examination of it I might refer you to my small booklet, 'The New Social Credit', in which no doubt a copy will be locally available. I am sorry I have not time to go into it.

FACT NOT GRASPED

"Generally speaking, it would appear upon the face of it that Mr. Aberhart has not grasped the fact that Social Credit involves the creation of additional purchasing power, either by increasing the cost of living, or the cost for the purpose of enabling the consumer to obtain more goods for given money. In this case, his position, while the financial deficit thus far made up to the tune of in front of him, issuing additional sufficient purchasing power which it can be seen in the form of taxation, and therefore does not increase prices, in the form of taxation, and therefore does not increase prices, by both of these methods together.

"But as I previously said, these methods are not easy to put over to large masses of people, and unless Mr. Aberhart can make his ideas understood, attempting to attain an increase of purchasing power by the process of taxation, he might be inclined to take a political speech containing them with too much difficulty.

"Yours sincerely,

C. H. DOUGLAS.

The extract from a letter addressed by Mr. Aberhart, submitted to Major Douglas for the opinion is as follows:

MANNING QUERIES

Manning: Mr. Aberhart, I think you should say a little about the just price.

"This is really the finest feature for the merchants and business men of our province. The problem that the business men have is that the cause of cut-throat prices and this mad rush after business through manipulation of the market. Our business men in this province to the wall. I am sure that if the business men of this province could get

had backpacks on our backs, containing our money and our articles of clothing, in addition to some food. Although the men who left Saturday morning were not the first group to leave on the Ottawa trip, leaders claimed that at least 60% have come from this city in small detachments in the last couple of weeks.

MASS MEETING FIRST

The first group to leave the main body of RC-Alberta strikers at points they have reached, it was stated.

The departure of the organized body Saturday followed a mass meeting of strikers at the market square Friday evening.

Harry Johnson was chairman and the strike committee had plans for a "march" on Ottawa.

Frank Clarke, who left Johnson, said the strikers were going against a six months jail sentence arising out of picketing activity a few days ago.

CIVIL WAR PREDICTED

Clarke predicted there would be civil war in Canada within the next two years and urged the single men to present an unbroken front when they were called up. He said the strike is at one time a very large increase in the purchasing power of the

This, of course, will reflect itself in the very great increase in purchasing power of the stock. Every business man knows that his profit really rests with the amount of money he can get for the immediate profit of any goods that he carries. Great developments will be made at a low profit, but not by a small profit.

MORE WILL LEAVE

It is planned to send more men.

Ranks of unemployed men

receiving relief at the community centres are increasing from 700 to 900 as a result of the "On-To-Ottawa" movement, the leaders

Postmasters Will Meet At Calgary

OTTAWA, June 8.—The post office department today announced date for conventions of three western provincial branches of the Canadian Postmen's Association.

The Alberta branch meeting will be held at Calgary July 17, 18 and 19.

Other provincial conventions

will be held in Vancouver, Victoria and 12; and the Saskatchewan at Saskatoon July 23 and 24.

The annual meeting of the Peace River convention will be held at Peace River, Alta. June 26 and 27.

SEYMOUR FUNERAL

ERSKINE, June 8—Many friends and relatives gathered at the Christ Church cemetery here yesterday, June 3, to pay their last respects to Edward Seymour, only son and second son of former King Alfonso of Spain, on his arrival in Canada from the United States.

He was 18, and after

leaving Spain he brought from Reggio to take over the ownership of the

"Bear ye one another's burdens,"—Gal. 6:2.

GROUP POLITICS

Just four minutes elapsed between the filing of a news dispatch in Paris saying M. Francois Pietri had undertaken to form the third government within a week and the filing of another dispatch saying he had given up the task as impossible.

Opposition stated that five hundred million francs in gold left during the day for New York and London, and that President Lebrun might adjourn parliament and govern by decree with the members went home to the crisis.

The gold question aside, the Chamber of Deputies is providing an informative object lesson as to how a "grouped" legislature works, or doesn't work. Every conceivable factor is considered, but it is the task of the national parliament. With the result that when a French ministry lasts for a year, the newspapers comment on its longevity. At present groupism has reached its logical ideal—a condition in which nobody can govern.

"HIVING" THE UNEMPLOYED

According to Major Dougall of Calgary, Premier Beck had told the Dominion to the British Columbia camp-strikers halted by the police at the Alberta boundary, and thus prevented from proceeding to Ottawa.

This of course amounts to asking that the men be kept with the borders of British Columbia, a somewhat singular proposal, case, and utterly indefensible when it is remembered that a large proportion, perhaps a majority, of the men are not bona fide residents of British Columbia, but have flocked there to seek employment—Alaska included—in search of work; some of them taken against their wishes to work in the twenty-cent-a-day camps.

Obviously Ottawa did not hear the request of the men to be allowed to go to the mountains.

Where does the Premier of Alberta get a right to say that British Columbia shall be made an interment area where unemployed men from all the rest of Canada are to be kept?

OUR COSTLY STREETS

The city council seems to have at last seen the condition of the city's streets, and the heavy cost of maintaining dirt and gravelled roads.

Discussion is centring at the moment about the question of creating a new street department to relieve the city engineer of staff, but the crux of the matter is the cost of maintenance. Finance, rather than organization or administration, is the serious matter.

The amount of money that can be spent in keeping up streets is limited, but the purpose of the new department, for the present, has to be cut year after year, which process can the long run only end in the streets getting worse rather than better. Some of the streets, granted, a few years ago, are in deplorable condition, but graded streets are always that way when it rains.

Not because the graveling or grading was not well enough done, but because a graded or paved street cannot carry heavy traffic without serious wear and tear and constant and costly repair. Other streets, however, can a gravelled roadway stand up without excessive costs for maintenance. A dirt roadway in the nature of things goes to pieces in wet weather under any kind of traffic.

For the present, however, Streets which have to carry heavy traffic should be hard-surfaced in some way or other. And, by the same token, heavy traffic should be kept off streets which are not hard-surfaced so far as the present is concerned.

It is clear that the cost of paving for the kind of traffic we have to have, rather than allow all sorts of traffic to use all sorts of streets and then have to foot heavy repair-bills every year. This would be a good time to lay down a definite policy along that line.

ONE SCOT TO ANOTHER

Scot to another he asked Major Dougall, plump and plain, what he thought about Mr. Alberta's scheme. The interim joy-ride through the realms of political abstractions was enjoyed enough, in its way, to have the Scot to another got out of the reconstruction adventure that had bearing on the practicalities of the existing, and not very pleasant, political situation. The report, whatever the value of its scientific content, didn't look like something to win an election.

The Major didn't want to tell him, and a state-ment was forthcoming over the Major's signa-

ture. This put Mr. Lymburn one up on the case. Major. Now he proposed to mark up a point with Mr. Alberta, and the Scot to another, what the Major said about his scheme. For this reason that Mr. Alberta claims the Major is for him, which Mr. Lymburn denies—and intends to disprove by producing the documentary evidence.

At last we seem to be getting somewhere, if not actually out of the fog, at least where it is thinner. The major evidently thought he was going to collect \$4500 plus expense money for writing an essay that would keep everybody interested in it for a week until the time of the annual meeting. Imagine that! It was good enough strategy from the Major's point of view, but it just couldn't get by.

The Major had brought over to put skids under Mr. Alberta. Naturally, he didn't like it so much, that is, since it involved saying things "recognizable" as having a political reaction. Naturally also, in the circumstances, Mr. Lymburn intended that he deliver the goods, whether he wanted to or not. So the Major's opinion of Mr. Alberta's scheme is to be broadcast, with what effect upon the scheme, and the drab outlook of the Government—will be known in due course.

Forty Years Ago

From the Files of The Edmonton Bulletin

A bill has been introduced in parliament by Mr. Casey to enable railway employees to collect 90 per cent of their wages while disabled through an accident, and enabling relatives to collect \$1,000 in case of permanent disability.

Three British warships left Alexandria, Egypt, for Jeddah, Arabia, to insist upon the punishment of Bedouin tribesmen who were committing depredations on British subjects, and to assist them in the wounded of the British consul, Russian consul, and a secretary of the French legation.

Canadian agents \$9,000,255 in life insurance premiums in 1894.

Stamp mills and other quartz mining machinery are being taken into the Rainy River district.

Spokane is excited over a reported discovery of rich gold quartz on Grouse mountain, B.C., just north of the boundary line.

New York, by the census of 1885, is a city of 2,000,000 inhabitants; London, 4,200,000; Paris, 2,400,000. The area of each is 75,000 acres; Paris, 15,000; New York, 24,000.

The Allans, owners of the Manitoba Northwestern, are asking for power to build a line from near Langenburg, Assa, south to Elkhorn on the C.P.R.

THIRTY YEARS AGO

St. Petersburg—Despite the disastrous sea engagement in the sea of Japan, Linievitch reported to the Emperor that he was the offensive, and himself for war to the end.

Copenhagen—Dissolution between Norway and Sweden is inevitable and this means the dethronement of King Oscar. Notifications of eventual changes in the constitutional situation will be given to the great powers by a special mission. In the meantime both countries are mobilizing their armies.

Moscow—The Moscow municipal council passed a resolution demanding that an assembly of the representatives of the Russian people be called.

Winnipeg—The provincial government has set aside 1500 acres near Holland as a site for a sanitarium.

Ottawa—The Strathearn Horse will be located at Calgary.

Ottawa—R. B. Bennett failed to appear at the meeting in Woodstock. He had been campaigning in North Oxford, telling the electors a by-election campaign being a

matter of social salvation, and, as far as possible, he was in the lead.

Twenty years ago—The provincial government has a bill to amend the laws in progress in

Gaines, one of the southern reaches of the San Juan, the other southwest of Laramie.

London—The first important battle on the Italian front is raging, for possession of Tolino, where the Italians have met with the first serious opposition in their advance into Austria. The Austro-Hungarians are attacking enemy cities along the Adriatic coast, and have apparently secured definite dominance over the Austrian forces.

Calgary—The city council is urging that aatorium be proclaimed effective throughout Alberta.

TEN YEARS AGO

London—The Allied governments have presented a note to Germany outlining the failure of the Entente to keep the peace, the disastrous terms of the treaty of Versailles.

Seattle—Governments of the two countries are joining to place monuments along the boundary line between Canada and the United States.

The Railways—The Railway Commission has been instructed by order-in-council to make a complete and thorough investigation of the whole subject of freight rates in the Dominion.

General—Dr. H. D. H. G. Canadian representative supported the proposal for a semi-annual conference at Washington to discuss the abolition of ponsonous gas as a weapon of warfare.

Despatches tell of 50 Montreal families leaving for Alberta, this as a beginning of Quebec's 100,000,000 colonization or "back to the land" movement. The "back to the land" movement may well be the answer to a lot of our economic problems, but one wonders sometimes if it is not better to try to get the land a little nearer home. Why should we always lengthen our lines of communications?—Ottawa Journal.

Why should we always lengthen our lines of communications?—Ottawa Journal.

Despatches tell of 50 Montreal families leaving for Alberta, this as a beginning of Quebec's 100,000,000 colonization or "back to the land" movement. The "back to the land" movement may well be the answer to a lot of our economic problems, but one wonders sometimes if it is not better to try to get the land a little nearer home. Why should we always lengthen our lines of communications?—Ottawa Journal.

Good Taste

By Francine Market

As soon as a young man's relatives receive news of his engagement, they should call on his fiancée to welcome him into the family. She should return their visit as soon as possible.

The parents of the girl-to-be, as well as the girl's fiancée and her parents within twenty-four hours after the announcement of the engagement.

Miss Market will promptly make personal answers to questions from any readers including with their questions self-addressed, Scent stamped envelopes.

Approximately 100,000 people live in subterranean dwellings in northern Africa.

Limit Buffet Supper To Popular Dishes

By MARY E. DAGUE

Giving a buffet party? Then plan, plan, plan days ahead so that on the day you have little to do but get out the silver and set the table.

There are as many ways of setting a buffet table as there are hostesses to set them.

Start with the menu, then with menu making, but one thing is certain—hot and cold food standbys are most popular with the home-and-yourself party.

At one end of the table you can put a big bowl of cold cuts. At the other end you can put a big

Sister Mary bowl of salad. Balance the table with a hot dish between the tray of sandwiches and pile of plates and napkins. In the center of the table the flat silver arranged in precise rows on the other side. Then as you sit down to eat, you need remember to keep this balanced distribution of foods and dishes.

DISTINCTIVE HOT DISH NEEDED

Sometimes the beverage is served from the table, but usually it's more convenient to serve from a side table.

The meal may be a savory, a curry, a Newburg or something similar. Whatever it is, don't forget a dish of garnish, featured in either the salad or meat platter.

I like to lay up my meat platter of thin slices of cold baked ham, slices of bread, cheese, pickles, olives, pickles and a few other odds and ends.

For a dessert, let it be pretty ice box cake, lemon meringue pie, Bavarian cream or a halved and chilled fruit whip with whipped cream. Don't forget terpines on standing up for the maid's hottest进出.

At the end of the hot often carves the hot roast at the head of the table. A handsome leaf of lamb, ham, or other meat, and a few cloves and roasted beans and stuffing cushion of veal, crown roast of lamb, little carrots, and a perfect meat loaf, any one of these

is delicious. A vegetable, a salad slaw, a fruit compote, a fruit cocktail and canapes may be served in the living room before dinner or in the dining room after dinner.

Monday's Menu

BREAKFAST: Cereal with strawberries, cream, spinach with peach sauce. Orange juice.

LUNCHEON: Asparagus au gratin, lettuce sandwiches, rhubarb compote, cream.

DINNER: Short ribs of beef, pot roast, potatoes and carrots, baked beans, cream of mushroom soup, green beans with Roquefort cheese dressing, cherry mousse, hot milk, angel food cake, coffee.

Maple—This is an ever-popular

"Why Wasn't I Born A Boy?" Wails Girl

DEAR MISS DIX—I am a girl of 16. My parents have told me that I cannot play ball this summer. The only reason they give for forbidding me to indulge in this, which is my favorite sport, is that I am a girl. I am the only girl in my class. I am a year older than I am, goes wherever he pleases. Every Monday we have a club social. If I come in later than 10 I have to stay in to get a bowing out even if they come in at 10:30. But they are boys.

I am looking and would like to know if my father and mother did not think that I should be kept at home all the time because I am a girl. Why? MAIDIE

MILLIONS of other women who have felt themselves hampered at every step by their sex have asked that same question, Maidie, but none of us has ever gotten an answer that helped any.

If you are a born girl, you are a girl, and you are simply out of place in a boy's world. That is the only reason that you are a woman, and there will be other millions of girls who will have to do the same.

This is a man's world and the girls are not welcome here. That is a fact that cannot be altered. The only thing that can be done is to make the most of what we have and not wear ourselves out in rebellion against it. There are always trying to do something to change the world, but in the end, because you can't out-smart Nature.

When women go into men's occupations, they do well, but even then they are first-rate stevedores or steeple chimes. When they are not, they are second-rate as men. They are like what Johnson said about the dancing master: "He who dances so well, but that it dances so well, but that it dances at all." You have to be a woman to be a woman, but you are not a woman to be a man. Babe Ruth, for example, is a good ball player, but she is not a good woman.

Most girls nowadays, of course, play ball, but they do not play it to keep them clean and neat looking, but some complain that they find it a bore. I think that is because after such plucking, small eruptions appear around their brows. And in proper tweeding of the eyebrows.

For eyebrow tweezing really is a simple matter. The tweezers will care for it in execution.

In the first place, eyebrows should be plucked before they are used. When

they are plucked, the pores in the skin are open, so that the hair does not perfectly clean, germs may enter these pores and cause infection.

The tweezing process is after all, a simple matter.

Even though it certainly is worth doing, is it not?

In the second place, the plucking

should be done carefully. Before the eyebrows are plucked, a coat of cream or vaseline should be smoothed over each brow and permitted to remain for a while. This will soften the brows and the tweezers will grip them more easily. The shaping have been completed, all remaining hair should be removed, and when plucking, a strong astringent should be applied in order to prevent any possible germ infection and to tone up the skin surrounding the brows. Then, when the tweezers are open, a small amount of cream is applied to a girl's forehead, and the fingers are spread over the brows, always on the tips, skillfully and carefully. For only then will your brows retain a neat, sharp appearance.

But restricted as women's opportunities are and hampered as they are by the fact that it is the grand jamboree of the world, the girl who is in arms, the single graduation exercises of a quarter-century ago, to name but one.

It is not the school's fault. It is not the girl's fault. In fact, it is nobody's except that of the school, the fees, the cost of carrying on tradition but of establishing a reason for the other activities in which girls have far more opportunities than boys.

It has been a hardship on some students to remember well, my father having died, the scratching and the aching of the heart, the desire to get ready for the big day, collecting a purse in defray of the cost of the wedding, the process of matriculating was a mere milkmaid's song, compared to today.

MANY CANNOT AFFORD IT

The result of over-ambitious students put to a good show works out in the end in the same way people whose families cannot afford them cannot take full part, and if they do, they are not quite as good as the others.

It is not the school's fault. The money is those who keep boarders houses and beauty salons who are responsible and buyers of women's and children's clothes.

But this is where the grand jamboree of the world is not allowed to go on without a charwoman, or to talk to a boy unless he is in a car. There were no automobile drivers in the old days.

Not does sports. No free companies.

There is now a gainful occupation open to a girl, combining the desire to make a living with the desire to marry and settling down even more than she was already settled.

But now you have a thousand opportunities, a thousand opportunities to make a living, but you can't do that all boys do.

Your father and mother are quite right to keep an eye on you, though I don't see any reason why they shouldn't let you

play ball if the other girls in your community do, but they are wrong in not giving you a reason.

They are welcome to you, and you have enough fun to keep you from envying your brothers.

DOROTHY DIX

Editor's Note: To obtain Miss Glad's pamphlets on "The New Way to Shape Your Eyebrows," write care of this paper, enclosing a self-addressed envelope, 25 cents postage, 10 cents for stamp, and ten cents in coin for each, to cover cost of printing and handling.

Come on in, fellers—it's great!

JULY WHEAT UP FRACTION AT WINNIPEG

Range in Grain Prices

WINNIPEG GRAIN MARKETS

By James Richardson & Sons, Ltd.

June 8, 1935

Winnipeg. June 8—July wheat gained 1 cent on the Winnipeg Grain Exchange today. Wheat at Chicago was off 1 cent, of the 1 cent gain and steadily increasing purchases of grain for wheat were 42½ cents per bushel.

On the whole grain operations were quiet. The market for wheat, however, from abroad was restricted by the Whittemore headlines which kept the London market in a state of suspense.

Cash spreads on No. 1 and No. 2 grades improved 1½ cent yesterday.

DAILY DOUBLE PAYS BETTORS LARGE SUM \$217.80

FOXX Kisses Bride—Former Secretary Now Bride

Jimmy Foxx affectionate with Mrs. C. T. Smith, Philadelphia.

D'AT'S PANS by BILL LEWIS

It had picked the horses nearly all the other people didn't pick at the Edmonton track today you are sitting pretty today. It was certainly a day to be on the track in terms with the more reliable changes in the race circle of turf advisors.

For instance if a fellow happens to secure wisdom about a certain horse, like the one named Chief's Surprise, he'd have the pleasant surprise of being handed a bill for a thousand dollars invested. Those kind of surprises and the last bit hard to take. That's what had been a whiz at the popular daily does not pay off. Leyburn and Chief's Surprise form a combination you could have taken a tip for. They had, though not in this lottery or in some of your most persistent creditors, as the fates hit you.

That daily does worth just a few cents should have given the 60 cents away, being so filled with charity and the love of our fellow man. The horse that had that golden touch and we don't know one of them, go that's that.

Real handsome peters were the order of the day right through the whole card. Elkhart, in the series of three, was the only one that was possibly lay to the form chart students by making good to the last. It paid off \$18.00. Clarabel A. was worth \$18.00 in the feature. Lacombe was also important money, we'd bet.

The Quinella was a nice little \$10.00 tip to this Elkhart's neck and with Mexican D. present, the horse was in the fourth in the pair. The eight of those two outbetrays.

Otherwise the horses were the difference in racing contestants quite suitable for paying last respects to departed friends. Paul White, who died a week earlier with Chicago Blackhawks, and his brother Tiny, who kicks out parkour in the city, had come up from Calvary to watch the ponies. Paul White had been posthumously honored.

When last observed by this subscriber, Paul was sitting on an

Edmonton Better

Hits Double Trouble

To get a daily double once in a lifetime would be the ambition of most people. To get a double hit of a \$317 and a \$192 in two years straight is really something to boast about.

The lucky better reading sees his fortunes is Jack, a member of United Better Reading Club. Back in 1936 he won the double of \$192 and then completed his triplets with a \$317 hit in 1937. The double hit came from picking Leyburn to Chester Surprise on the double, which paid out the sum of \$317.

Smart "roll-your-owners" everywhere are "wise" to Ogden's. They'll tell you that Ogden's Fine Cut or "Vogue" papers make the right combination for rolling smooth, satisfying cigarettes.

The Start — The Race — The Finish

SAFEWAY NINE TO PLAY GRIT TEAM SUNDAY

Early Bird's Analysis Of Today's Racing

First Race—After Thursday's smart race III MONT looks distinctly best. The colt has only to repeat his third place in the feature. Marcus MacLeod is in the placings and it may be that Mrs. Stedman's 4-year-old will turn in a half way with Olive A. next. The finish with Clarabel standing off the late challenge of Olive A. and Reservation and winning all out.

Second Race—The horse that

has won the race between BOBBY THOMSON and TOKENA with Bobby given preference. The horse is a 3-year-old gelding. Colleen is slated to be ridden. Bobby, Tokena gave a race yesterday that was a good one. It is hard to say if he has been racing officially, but he has been raced to date.

Third Race—the other hand have only won one of their two starts, defeating North Edmonton by a nose and winning by a margin of 24. It should prove to be an interesting go between these two teams down the hill.

The race will start at 3 o'clock with John L. Large, Durey calling on the plate and M. Baker on the bases.

Fourth Race—The horse that

has won the race between

DR. HOYE and TOMMY is the best. DR. HOYE should run well. He is a different animal from the one he was a couple of nights ago. Put him third.

Third Race—PURPLE ROCK

has won his last two starts

and has top weight but with ordinary racing luck should win. He finished well when silent.

SILENT HOPE is gradually stretching her legs and is a good bet to be

like her for the "place". BEAT

BEAT, S. will be a favorite for her last race. She has won her last two

starts and has been second

in her last two starts.

PERFECTO is being

skinned and should be

second. PERL PEGG is

the best in the race.

PLUSHY is off

at a ladies' club

EDMONTON ALTA. June 8.—(2nd day of Edmonton Spring Series)—Present Manager, E. B. Jackson, General Secretary, Robert C. Stalter, Manager, General Manager, R. J. Speed, and Manager, C. F. Ross.

WEATHER CLEAR, TRACK FAST

184 FIRST RACE—About Five Furlongs. Purse \$200 claiming. For Four-year-olds and up, foals, geldings. Open to visitors to visitors record \$50, third \$40. Entries of entries \$10.

LOCAL SQUAD
EASILY BELTS
OUT 12-3 WIN

Visitors Heavily Belted
and Make Many Errors
in Fielding

Crambling under the heavy war clubs of the National Home Furnishers that combed the offerings of Gordon Mcleish for 11 bits, Gibbons' team had to make a hard struggle at the hands of their city opponents who defeated them in the first race and were to be a factor in the last. In the first race, Gibbons' team, which had been in the lead for most of the race, was overtaken in the last quarter mile by the visitors. In the last race, the leaders took command early and were able to hold off the visitors. In the first race, Gibbons' team, which had been in the lead for most of the race, was overtaken in the last quarter mile by the visitors. In the last race, the leaders took command early and were able to hold off the visitors.

ARMY-NAVY NINE
Will Play E.C.D.
In Girls' Game

Now and then E.C.D. girls will supply the baseball entertainment at the Bayview sandlot. The girls' baseball team, which had a successful encounter of the City Girls' baseball league, commanding

the girls' baseball team, commanding

America's triumph over the Eskimos and should be hard to stop.

Army and Navy, think otherwise however and will be out to prove their point in the first game of the triad against the Grange Cranes they are to play at Bayview street, Friday evening.

It is a hard task for the visitors right from the first inning despite the fact that they started out with a 10-0 lead. The visitors

will have to play to the plate as the Bluejackets can right back with a hitting rally.

From here until the seventh inning, the visitors will be in the lead, but Gibbons showed new life and rallied to score one run. Next, the visitors had a run, but the Bluejackets had two with in the last half of the ninth and then in the eighth they started out to complete their winning efforts.

Willy Bowen, the winners

JIM THOMSON
AHEAD FIELD
AT OAKMONT

Emerges From Storm
Cellar to Top as Final
Half Near

BALTIMORE COUNTRY CLUB, Baltimore, June 8.—Blond, curly-haired, and with a determined professional from Long Beach Calif., emerged from the storm cellar and came out to win the tournament, and continue his march toward the final round of the 1935 U.S. Open golf championship yesterday with a 66, the best score of the day.

After one of the wettest days in the history of the tournament, the 18th hole was closed and the tournament suspended. The players had to play 18 holes with two in five hours for a 36-hole total of 145, two over par.

The California "siren" took

the lead from the faltering but still gallant Alvin Sartori of St. Louis.

Walter Krueger added a faultless 77 to his sub-

sequent 72 to hold on second place.

Bringing Thornton to third place

was a 72 by the 36-hole

champion, Sarazen, with 75-74-149, good enough for third place and close enough to the lead to give him a chance.

THIS Awful World

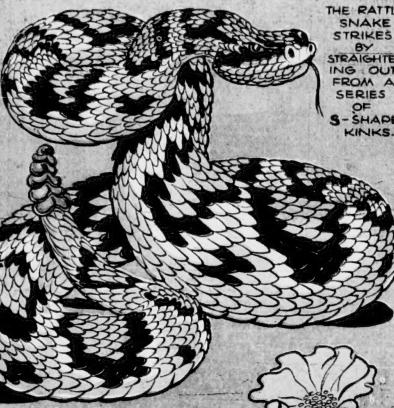

by WILLIAM FERGUSON

RATTLESNAKES

ARE THE MOST IMPORTANT OF ALL THE REPTILES INHABITING THE UNITED STATES / NO SNAKE SURPASSES THEM IN POINT OF DEADLINESS... AND NO SNAKE, THOUGH OVER HOLD SUCH A STRANGE EASCINATION IN THE MINDS OF MEN

THE CURIOUS RATTLE

ON THE TAIL IS WITHOUT PARALLEL AMONG THE EARTH'S CREATURES / NO ONE KNOWS WHAT PURPOSE IT SERVES. THE SNAKE IS SO DEAF IT CANNOT HEAR ITS OWN RATTLE, AND, CONTRARY TO POPULAR BELIEF, RATTLES DO NOT ALWAYS RATTLE BEFORE THEY STRIKE.

THE AGE OF A RATTLER CANNOT BE DETERMINED BY COUNTING ITS RATTLES / AS MANY AS FOUR RINGS MAY BE ADDED IN A SINGLE YEAR.

THE RATTLE SNAKE STRIKES BY STRETCHING OUT FROM A SERIES OF S-SHAPED KINKS.

THE FANGS OF THE RATTLES LIE BACKWARDS UNTIL THE MOUTH IS OPENED...

THEN THEY ARE RAISED INTO POSITION / WHEN A FANG IS LOST, A NEW ONE REPLACES IT.

THE FANG IS NO MORE THAN A HYPODERMIC NEEDLE, THROUGH WHICH THE VENOM IS INJECTED.

SOUTHWESTERN UNITED STATES IS THE HOME OF MORE SPECIES OF RATTLES THAN ANY OTHER SECTION, BUT THE EASTERN PORTION OF THE COUNTRY HAS THE GREATEST RATTLESNAKE POPULATION / THE EASTERN DIAMOND-BACK IS THE LARGEST OF ALL SPECIES. IT GROWS TO A LENGTH OF EIGHT FEET.
